Vanities

The project.

With over 40 galleries to explore displaying art, applied art, social history, archaeology and ethnography, the Birmingham Museum and Art Gallery is a fantastic place to visit. It houses part of the largest Pre-Raphaelite painting collection in the world and offers a series of changing exhibitions throughout the year. Footfall is high so the gallery decided it was time for a washroom upgrade to accommodate their many visitors.

The challenge.

As well as accommodating a high volume of visitors daily, the BMAG also offers regular Venue Hire. Due to their previous washrooms looking washed out and tired, the BMAG needed sturdy new washroom facilities that were built to last and suitable for use by all visitors; from babies and small children, to adults and disabled customers.

The solution.

Quantum toilet cubicles were specified for all phases of the washroom re-development, along with Solid Surface vanity units and Vepps Solid Grade Laminate (SGL) panelling, with pre-plumbed SanCeram sanitaryware.

With a sculpted headrail and a sleek floating appearance, our Quantum toilet cubicle range sets the benchmark for washrooms. Fittings are available in either Light Grey powder coated aluminium or ABS, with doors, pilasters and partitions available in 34 colours; which gave Birmingham Museum & Art Gallery complete flexibility.

Our Quantum cubicles are available in MFC, HPL and SGL, meaning that the flexibility doesn't end with the

colour. Quantum SGL cubicles are extremely resistant to impact and also totally impervious to water, the perfect washroom solution for environments with a heavy traffic flow, such as Birmingham Museum & Art Gallery.

Our revolutionary Vepps pre-plumbed panelling system meant installation was quick and easy, with panel heights varying to comply with the listed status of the building.

The SanCeram sanitaryware was pre-plumbed and tested in our manufacturing facility, meaning the Vepps panels could be click-fixed into place in no time at all. High strength linear-bearing hinges provide smooth movement and allow panels to be positioned at different heights, so maintenance couldn't be simpler.

We're so pleased to have been part of such a prestigious project and are thrilled to hear how Birmingham Museum & Art Gallery are now able to offer modern, stylish and inclusive washroom facilities to all their visitors.
