

## Citibank Riverdale Data Centre

Lewisham, UK

Infinite Veneer,  
Vepps SGL &  
Solid Surface  
Wash Troughs

### The project.

Citibank's mission is to serve as a trusted partner to their clients by responsibly providing financial services that enable growth and economic progress. The New York based company's London data centre is in Lewisham, where 1,000 employees work in data entry, technical support, IT and account services.

### The challenge.

Originally completed almost 20 years ago, the washroom facilities in the five storey building were tired and in need of updating. Citibank needed to update their staff washrooms with easy to maintain systems. As Citibank embarked on a mission to improve the sustainability of Riverdale Data Centre, they took the opportunity to upgrade their existing facilities, including the washrooms.

### The solution.

Infinite Veneer Full Height cubicles were specified in 'European Oak Crown Cut'. The ultimate in classic modernity, FSC MIX certified Infinite Veneer delivers sleek, clean lines, flush-fronts and minimalist fittings. Satin anodised aluminium pedestals are set back on the partitions to give the cubicles a "floating" appearance.

With a minimal floor clearance of 20mm and a ceiling clearance of 30mm, Infinite Full Height cubicles offer Citibank's staff maximum privacy.

The stainless steel lever operated slimline mortice lock indicator bolts offer quick emergency release from outside of the locked cubicles; so that no damage is done to the cubicles or locks in the event of an emergency.

Meeting Building Regulations' guidelines, Citibank Riverdale Data Centre specified ambulant cubicles with outward opening doors and our satin stainless steel pull handles for ease of use.

Vepps WC, urinal and wall panelling was specified with 'Gunmetal' panels and 'Porcelain' flashgaps in Solid Grade Laminate (SGL), as well as SGL urinal modesty screens. SGL is impervious to water so can withstand heavy duty cleaning, which is required in busy washrooms such as these. By choosing Vepps, Citibank had extra peace of mind as each panel and the market-leading sanitaryware was pre-plumbed and rigorously tested in our manufacturing facility before being installed on site.

Modern and stylish solid surface wash troughs in 'Everest' were chosen to complement the rest of the washroom systems specified. With SGL underframes in matching 'Porcelain' laminate, this is a durable and hardwearing vanity solution for heavy usage washrooms.
