

## Denbigh Leisure Centre

Denbigh, UK

Fusion SGL, Vepps SGL & Hardwood Benching

### The project.

Denbigh Leisure Centre is a sports and swimming centre in the heart of Denbigh. The centre is open seven days a week and provides access to a swimming pool, sports hall, fitness suite, gymnasium and all-weather pitch for both members and pay as you go customers.

### The challenge.

In 2016 the Council agreed to fund a £250,000 revamp of the Centre to refresh the previously outdated facilities and Venesta were chosen for the washroom and changing room section of the refurbishment.

Due to increased public demand, the existing washroom area had become worn out from heavy usage. As a result, Denbigh Leisure Centre requested a washroom cubicle that would withstand high volumes of traffic on a daily basis, be hygienic, resistant to water and vandalism and include a smart, bright colour to maximise space.

### The solution.

Fusion cubicles were specified in Solid Grade Laminate (SGL) for the changing rooms and toilets. It's an easy to clean, durable material that's suitable in both wet and dry environments.

Fusion was the ideal range due to the slimline frame and increased door allowance, which not only holds great visual appeal but enables easier access in and out of the cubicle. The metal frame fixes directly into floor mounting blocks making the toilet and changing cubicles supremely strong and secure. An ideal solution for high footfall washrooms such as these.

With a range of 34 laminates to choose from, the toilet and changing cubicles were specified in bright yellow to create bright, fun and modern facilities.

The changing room benches specified are manufactured using hardwearing solid beechwood slats, to withstand the heavy-duty use in the wettest of environments.

The Leisure Centre specified Vepps, our pre-plumbed panelling system. With a range of industry-leading sanitaryware to choose from, we pre-plumbed and tested the toilets to each unit. This not only sped up installation but also offered the end user added peace of mind.

Vepps helps make ongoing maintenance simpler thanks to the 90-degree linear bearing hinges on the access panels. Duct space is concealed and inaccessible, helping to keep Denbigh Leisure Centre's visitors and staff safe at all times.
