

The Heyford Hotel

📍 Oxfordshire, UK

☰ Unity Full Height SGL, Rapiduct SGL, Solid Surface Vanities & Baby Change Unit

The project.

The Heyford is a newly opened boutique hotel located in the new mixed-use development of Heyford Park in Oxfordshire, comprising of 18 rooms, a restaurant, bar and bowling alley. The hotel has a real sense of style and luxury and this is reflected in the washroom design where completely new female, male, accessible toilets and a family washroom with changing facilities were installed.

The solution.

Unity Full Height toilet cubicles were specified for all the washroom facilities in the hotel. Our 'Weathered Grey' wood effect solid grade laminate (SGL) with slimline satin anodised aluminium fittings created a sleek, modern design. Our Unity cubicles, which are flush fronted for a floating appearance, are simple yet stylish. Unity cubicles are robust enough to withstand high traffic and daily cleaning, making them ideal for public entertainment areas.

Rapiduct SGL, our simple low-cost duct panelling system, was specified for inside all the cubicles also in 'Weathered Grey'. The male washrooms feature urinal privacy screens installed at full height for maximum privacy and with floor to ceiling posts for strength.

All products were specified in SGL making them impact resistant and also totally waterproof, so perfect for WC and urinal panelling.

Hardwearing solid surface vanity units in 'Everest' feature throughout the hotel washrooms, chosen due to their impact resistant and long lasting qualities. They were fitted with fully inset basins for a seamless, integrated appearance. In addition, a baby changing unit with anti-roll front upstand and hygienic wipe-clean HPL surface was specified for the family washroom.
