

## Tudor Grange Academy

📍 South Solihull, UK

☰ Centurion Full Height SGL & Vepps HPL

### The project.

Rated 'Outstanding' by Ofsted, Tudor Grange is a comprehensive school in South Solihull. Awarded 'World Class School' status, it's committed to delivering a high-quality educational experience for its 1,600 students.

It's a popular Academy in the local area and is proud to have a national reputation for excellence. As part of their renovation project, the Academy had a washroom refresh on their agenda, ensuring students had access to modern and hygienic facilities throughout the school.

### The challenge.

The Academy strives to create a safe and secure space for its students and staff, giving everyone the opportunity to achieve and succeed. They wanted to make the new school washrooms a more open and less intimidating space for all students.

Tudor Grange Academy had a requirement for robust, high specification toilet cubicles that would be able to withstand the rigours of a large and busy Academy; as well as a panelling system that would be easy to maintain.

### The solution.

Renowned for strength and rigidity, Solihull Council chose Centurion Full Height toilet cubicles for six male and female unisex school toilets around the campus.

Robust Centurion Full Height toilets cubicles specified in dark grey laminate, with pre-plumbed Vepps panelling in yellow and green help create a positive and bright unisex washroom environment. Combine that with

the hardwearing materials chosen, Tudor Grange's washrooms could withstand even the most boisterous teenage antics.

The combination of Solid Grade Laminate (SGL) toilet cubicles and High Pressure Laminate (HPL) Vepps panelling is a hardwearing and economical washroom solution. The waterproof, smooth surfaces of SGL can endure the levels of heavy-duty cleaning and strict hygiene protocols that keep students and staff safe.

Along with robust fittings, the toilet cubicle's SGL doors and partitions are impact, heat and scratch-resistant. Full height cubicles and fluted, floor fixed, powder coated aluminum pilasters give extra privacy and stability.

Installation was during school holidays which meant there were strict time constraints, so Vepps, our industry-leading pre-plumbed paneling system, was the obvious choice for Tudor Grange Academy. Tried and tested in our factory, the integrated basin plumbing and panelling is quicker to install, leaves duct spaces secure and inaccessible, and provides easier ongoing maintenance.
