Unity inline cubicles maximised space in the new washroom area

### The project.

United Talent Agency is a global literary agency and is one of the largest in the world. Established in 1991, they have approximately 900 employees with offices in Los Angeles, London, New York, Nashville, Miami and Malmö. The London branch recently underwent renovations, which saw the need for new washroom facilities.

### The challenge.

The previous office toilets at United Talent Agency were incredibly dated and needed refreshing to reflect the rest of the company's style, especially with clients using the facilities.

The new, high-quality Venesta washroom systems were delivered on time, within budget, meaning that the new facilities could be opened to staff within good time.

### The solution.

Our Unity full height toilet cubicle range was specified as inline cubicles, in conjunction with Rapiduct, our bespoke panelling system, a cost-effective solution for a low-risk environment.

In this particularly narrow washroom layout, the inline design served as a space saver. Inline cubicles are accessed from the side rather than face-on, so that the walls absorb the depth of the cubicle, to maintain a spacious environment.

Unity toilet cubicles boast a modern, floating appearance while ensuring maximum privacy at full ceiling height, with a floor clearance of just 50mm.

To ensure durability in these busy washrooms, Unity's stainless steel fittings were a perfect choice for United Talent Agency.

Our highly versatile and functional washroom panelling system, Rapiduct, was specified alongside our popular Unity toilet cubicles. Both finished in a white laminate, it further modernised and brightened the relatively small washroom area.

The finished washroom boasted a fresh, contemporary space that met all initial requirements. Tara Vickers, Office Manager; United Talent Agency was very pleased with "the sleek look of everything".
