The project.

Tight-knit family business Perrywood Garden Centre have been providing quality goods since the 1950's. In recent years, their Sudbury site opened and was instantly loved by locals and those visiting the area. To ensure they were offering excellent service in all areas, they required a washroom refurbishment that matched the high standards they were displaying across the site.

The challenge.

Perrywood is a destination for all, with an array of things for the family. From dining and gardening to furniture and living, the garden centre offers a hub to be enjoyed by all.

It is notable that a clean, sleek washroom is key to customer experience. With this in mind, a durable, safe washroom system was needed to withstand the high footfall levels and remain easy to maintain throughout the day.

The solution.

The client specified our Titan cubicles for their robust design. Titan features a unique satin anodised aluminium shoe that increases rigidity, providing long-lasting quality. Maximum user privacy is also guaranteed thanks to the floor to ceiling pilasters.

This range also prioritises user safety with our standard anti-finger trap hinges and emergency release indicator bolts. Perrywood will have a range of ages visiting the garden centre, therefore the anti-finger trap hinges will prevent any accidents with children potentially trapping their fingers. The emergency release indicator bolts also allow staff to act efficiently in case of an emergency to access inside the cubicle.

For the WC's and urinals, the client opted for our Vepps panelling system. Vepps is a pre-plumbed system that

allows for easy and quick installation on site, with a wide range of sanitaryware available. Due to the garden centre having a heavy flow of visitors throughout the day, they also specified the panelling in SGL for maximum rigidity.

To complete their washroom renovation, Perrywood decided on CV2 profile SGL vanity units for their handwashing area, providing a space that allows for the heavy traffic flow of guests. The vanities are easy to clean for staff to maintain, and impervious to water to prevent damaging the laminate. Under panels were also specified to protect the plumbing from potential vandalism, keeping customers safe.

This washroom refurbishment demonstrates how considered product specification and thoughtful design can elevate visitor facilities within a busy, family-focused destination. By combining robust, high-performance materials with a warm, natural aesthetic inspired by the garden centre setting, the new washrooms at Perrywood Garden Centre deliver inclusive, safe and easy-to-maintain facilities that enhance the overall visitor experience while standing up to the demands of high footfall.
