Modern and striking  
washroom package for  
refurbished garden centre

### The project.

Award-winning Polhill Garden Centre has nearly 60 years of gardening experience, boasting a wide array of products and services to cater something for everyone, from outdoor furniture and gardening tools, to restaurants and pet care. The thriving garden centre located in Kent has grown hugely successful, with its 160 members of staff hosting numerous popular events throughout the year.

### The challenge.

The garden centre has strived to provide the perfect day out experience for the whole family, undergoing major renovations to open a brand-new restaurant, gift shop and children's play area.

Polhill Garden Centre required a complete refurbishment of the existing washroom facilities, to ensure accessibility and comfort for all visitors. It was vital the toilet cubicles were robust and had a functional design, to withstand the high expected footfall and to easily maintain washroom cleanliness for guests, as well as a speedy installation process to begin welcoming guests.

### The solution.

Modern and striking Unity toilet cubicles were specified by Polhill Garden Centre, for their simple yet impactful flush-fronted design. The cubicle's pedestals are set back on partitions to give them their floating appearance and clean finish, for great value without compromising on style or quality.

Specified in impact-resistant and water impervious Solid Grade Laminate (SGL), it is the perfect material for heavily used washrooms in a public retail setting. Robust cubicle

hardware and fittings in satin anodised aluminium guarantee durable cubicles that will stand the test of time.

The Unity toilet cubicle range delivers safety as well as style, with emergency release indicator bolts to ensure guests' security in a bustling environment. Rapid access can be gained inside locked cubicles, without the need to remove or cause damage to the doors, pilasters or indicator bolts.

Our groundbreaking, pre-plumbed panelling system Vepps was specified due to its ultra-strong aluminium frame and simple click-fix assembly. The bespoke system is 50% faster to install compared to plain panel alternatives, ensuring the client kept to their renovation timeline and was able to open the washroom facilities to visitors.

With 34 colour options in SGL available, the client specified their Unity cubicles and Vepps pre-plumbed panelling in 'Cloud' to complement the contemporary wood effect interior of the washrooms, and create a sophisticated and calming design.

We were thrilled to deliver a seamless and modern washroom package to Polhill Garden Centre, that surpassed the brief to accommodate renovation improvements for visitors.
